Document classes

book	Default is two-sided.
report	No \part divisions.
article	No \part or \chapter divisions.
letter	Letter (?).
slides	Large sans-serif font.

Used at the very beginning of a document:
`\documentclass{class}`. Use `\begin{document}` to start contents and `\end{document}` to end the document.

Common documentclass options

10pt/11pt/12pt	Font size.
letterpaper/a4paper	Paper size.
twocolumn	Use two columns.
twoside	Set margins for two-sided.
landscape	Landscape orientation. Must use dvips -t landscape.
draft	Double-space lines.
Usage: <code>\documentclass[opt,opt]{class}</code> .	

Packages

fullpage	Use 1 inch margins.
anysize	Set margins: <code>\marginwidth{l}{r}{t}{b}</code> .

Title

<code>\author{text}</code>	Author of document.

<code>\section{title}</code>	<code>\subparagraph{title}</code>
<code>\subsection{title}</code>	
Use <code>\setcounter{secnumdepth}{x}</code> suppresses heading numbers of depth $> x$, where <code>chapter</code> has depth 0. Use a <code>*</code> , as in <code>\section*{title}</code> , to not number a particular item—these items will also not appear in the table of contents.	

Text environments

BibTeX example

The BibTeX database goes in a file called `file.bib`, which is processed with `bibtex` file.
